Tranquil-U NEW!

ONE PUMP. ANY ORIENTATION.

2 YEAR WARRANTY

The all-in-one condensate pump that senses water in any position.

Unlike conventional condensate pumps with a separate reservoir and pump unit, Tranquil-U integrates sensing, collection, and pumping into one compact body.

Its innovative capacitive sensor detects water-level changes in both horizontal and vertical orientations, giving installers the freedom to position the pump wherever the application demands.

As condensate enters, Tranquil-U automatically adjusts its flow rate to match - delivering quieter, smoother and more efficient drainage.

ENGINEERED DIFFERENTLY

01

360° Water-Level Detection

Reliable capacitive sensing in both horizontal and vertical installations.

02

All-in-One Design

The reservoir, sensor and pump are integrated into one slim, compact unit.

03

Install It Your Way

Mount horizontally or vertically to suit different indoor-unit configurations and space constraints.

04

Adaptive Flow Control

Pump output automatically responds to the incoming condensate flow.

05

Quiet by Design

Smooth, demand-based operation with a sound level of just 17-19 dB(A).

06

Diagnostic LED

At-a-glance operating status and diagnostic feed back.

BUILT FOR INSTALLATION FREEDOM

One integrated solution for wall-mounted, ceiling-mounted and concealed air-conditioning systems.

18 L/h	12 m	17-19 dB(A)	187 x 29 x 29 mm
